DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I.   Claims 1-18, drawn to a data compression method, classified in class 707,

subclass 101.

II.   Claims 19-24, drawn to a method of watermarking compressed data, classified in

class 713, subclass 176.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single

combination. Claims 1-18 deal with the aspects of providing a compression method and claims

19-25 disclose a method for adding watermark security to a compression method, Claims 1-18

displays a separate utility of a system in which the overhead of adding a watermark is not

necessary.

Because these inventions are independent or distinct for the reasons given above and

have acquired a separate status in the art in view of their different classification, restriction for

examination purposes as indicated is proper.
